

HIGH-RES MACRO AND CLOSE-UP NATURE PHOTOS - ALBUM ONE
February 21, 2011

By Michael Erlewine (Michael@Erlewine.net)

The earlier photos did not come out high-resolution. I may have pressed the wrong button. These, however, are so you can view them by pressing the "Download in High Resolution" option on your left.

If you like close-up and have the time, look at a few in high resolution although this is still not even near the actual resolution.

THESE ARE A REAL TRIP IN HIGH-RES, at least for me

Michael
