

TWO NEW FREE MACRO PHOTOGRAPHY BOOKS

October 28, 2011

By Michael Erlewine (Michael@Erlewine.net)

For my photography friends here are two new free e-books on close-up and macro photography as I understand and practice it. Yes, it is technical but some of you are interested in taking nature photos, so this might be for you. And there are two volumes, one on close-up photography and the second on macro lenses. The first volume also has a scores of large full-color nature photos.

Just finished: two free e-books on close-up and macro photography, including an emphasis on focus stacking and mini-panoramas. Details on each volume are listed below. Feel free to share these with anyone interested.

Close-up and Macro Photography: A Primer
Book One: Macro & Close-up Technique
Includes Focus Stacking and Mini-Panorama
By Michael Erlewine

137 Pages, 150 Full Color Illustrations

The first in a two-book series on close-up and macro photography. This volume covers close-up and macro technique, equipment, in-the-field use, and even motivation and the spirit of this kind of photography. Included extensive detail on focus stacking and the creation of mini-panoramas. This is a companion book to the second volume in this series on macro and close-up lens, their specs, photos, and photos taken through with the lenses.

Close-up and Macro Photography: A Primer
Book Two: Macro & Close-up Lenses
By Michael Erlewine

153 Pages, 150 Full Color Illustrations

The second volume in a two-book series on close-up and macro photography. This book has detailed specifications on 42 of the finest lenses used for macro and close-up photography on Nikon systems. Photos of the lens itself and several ultra-close-up photos through each lens are included. This is a companion book to the first volume in this series on macro and close-up photography technique and equipment.
